OBJECTIVE

Software Developer with hands-on experience building scalable, real-time, and data-driven applications using modern backend and frontend technologies. Strong expertise in **ASP.NET Core, microservices, GraphQL, gRPC, WebSockets, and Docker**, with a focus on clean architecture, performance optimization, and reliable data synchronization. Experienced in developing responsive user interfaces using **React, Next.js, Angular, Single-SPA, and GoJS**. Microsoft Azure Fundamentals certified, with a strong focus on maintainable and cloud-native system design.

EXPERIENCE

Software Developer – WonderBiz Technologies   **Mar 2025 – Present**
- Developing and maintaining **.NET 8 microservices** using **Clean Architecture, DDD, and CQRS**.
- Implemented **gRPC-based inter-service communication** and APIs using **GraphQL (Hot Chocolate)**.
- Worked with **Dockerized services**, EF Core migrations, and schema versioning.
- Participated in **code reviews, debugging, and production issue resolution**.

Associate Software Developer – Stavtar Solutions   **Aug 2024 – Feb 2025**
- Built and maintained **ASP.NET Core Web APIs** integrating accounting systems using REST and EF Core.
- Handled **data synchronization** for invoices, transactions, and vendor records.
- Optimized **SQL Server and MySQL queries** and followed Git-based workflows.

PROJECTS

Device Monitoring Project   **2025**
- Built a real-time system using **ASP.NET Core (.NET 8)** and **Next.js** with WebSocket updates.
- Implemented a **GraphQL backend service** for efficient querying of structured data.
- Developed interactive visualizations using **React** and **GoJS**.

eShop Microservices   **2025**
- Developed a modular e-commerce system using **.NET 8 microservices** with **DDD and CQRS**.
- Used **RabbitMQ** for event-driven messaging and **Docker** for local orchestration.
